DIABETES

The probabilities under Fulton's Diabetic Compound seems to us to be about as follows:

In cases of sixty years and over reports have been so encouraging that it is our belief that recovery or control that prolongs life in reasonable comfort is probable in most cases.

At fifty and over while response to the treatment seems to be the general rule, approaching forty the disease is very obstinate and we would not make strong claims.

Under thirty the results are very small, and in children recoveries have been rare and most of those were obtained through the aid of skilled physicians keeping the liver active, promoting nutrition and giving alkalines when necessary to control acetones.

Fulton's Diabetic Compound can be had at Honolulu Drug Co.

Ask for pamphlet.

It does not conflict with physicians' prescriptions. But where patients require codain we desire to submit something milder that contains no opium.

We desire every patient not improving the third week to write us. Always state age. Literature mailed free. John J. Fulton Company, San Francisco, Cal. We invite correspondence with physicians who have obstinate cases.—advertisement.
